Introduction

This document provides the main principles of organization of BFAR-Regional Fisheries Laboratory XII according to the requirements of the clause 5.0 of PNS ISO/IEC 17025:2017 standard.

1. Legal Identity and Responsibility

The BFAR-RFL XII is a discrete ad hoc division of the Bureau of Fisheries and Aquatic Resources of the Republic of Philippines, which is a legal entity supervised by the Department of Agriculture of Republic of Philippines. The BFAR-RFL XII reports directly to the BFAR XII Regional Director (Insert SO number and date).

2. Responsibilities of BFAR RFL XII

Laboratory testing conducted by the Regional Fisheries Laboratory Division should be done in a manner to meet the requirements of PNS ISO/IEC 17025:2017 and to satisfy the needs of the customer, the regulatory authorities or organization providing recognition.

The responsibilities of BFAR-RFL XII, are defined by the legal framework of BFAR-RFL and include the following:

The operation of the Regional Fisheries Laboratory is based on Rule 67.2 of R.A. 8550 mandating for the establishment of fisheries laboratories for inspection and fish disease surveillance and reporting, antibiotic residue monitoring, sampling, handling, transport and storage including but not limited to aquaculture farms, feedmill, processing facilities, fish port and landing areas and markets. Guidelines for the maintenance and operation including collection of fees and charges for examination services is promulgated under the Fisheries Administrative Orders (FAO) 213 and 220.

The RFL XII is committed in providing analytical services for the following tests in:

a) Fish and Fishery Products

Parameter	Test Method
Aerobic Plate Count	Pour Plate Method (FAO No. 210 Series 2001, ICMSF, 1986)
E.Coli	Multiple Tube Method (FAO No. 210 Series 2001, ICMSF, 1986)
Coliform	
<i>Staphylococcus aureus</i>	
Shigella	
Salmonella	
Complete Micro	Conventional Method (FAO No. 210 Series 2001, ICMSF, 1986)
Histamine	
Moisture Content	Fluorometric Method (AOAC Official Method 977.13)
	Gravimetric Method (AOAC Official Method 950.46)

b) Potable Water

Parameter	Test Method
Water Potability Test	SMEWW 23 rd Edition PNS 2017
Heterotrophic Plate Count	Pour Plate Method SMEWW 23 rd Edition PNS 2017
E. coli	Multiple Tube Method SMEWW 23 rd Edition
Total Coliform	
Faecal Coliform	
Enterococci

c) Shrimp and Aquatic Water

Parameter	Test Method
Bacterial Profile	
Total Luminous Bacterial Count	Serial Dilution (Spread Plate) (A Handbook of Shrimp Pathology and Diagnostic for Diseases of Cultured Panaeid Shrimp, World Aquaculture Society, 1996, Baton, Louisiana, Section 4: p4)
Total Vibrio Count	Serial Dilution (Spread Plate) (Aerobic Plate Count, FDA, Bacteriological Analytical Manual, 7 th Edition)
% Yellow Colonies	
% Green Colonies	
pH	Palintest Photometer Method
Temperature	
Calcium Hardness	
Alkalinity	
Ammonia	
Nitrite	
Nitrate	
Dissolved Oxygen	
Turbidity	

d) Live Aquatic Animals

Parameter	Test Method
Parasitology	Wet Mount Microscopy (DOST-PCAARRD, ser. no. 97/2016 p/162 Fish Parasitology and Aquaculture Management in the Philippines Fish Disease: Diagnosis and Treatment, 2 nd Edition)
Gross Examination	
WSSV	Conventional PCR using IQ 2000 kit
EMS/APHND	
TiLV	IQ Plus with Pockit System

Stakeholders served

- BFAR Fish Inspection, Fish Health Unit and Quarantine Office
- Other Government and Non-government Sectors
- Academe
- Private Sectors e.g. Fish Farmers, Exporters

3. Scope of PNS ISO/IEC 17025:2017

BFAR-RFL XII implements a Quality Management System, according to PNS ISO/IEC 17025:2017, which covers the analytical services offered by its laboratories. These services are specified in the QMS documents.

4. Management Structure of BFAR RFL XII

The management structure of BFAR XII is determined by the legislation and is presented in the Organogram (LR 01-01 Organogram).

The Regional Director of BFAR XII acts as the top management with respect to the issues of PNS ISO/IEC 17025:2017 and QMS implementation. The following will report to the Regional Director of BFAR XII:

- The Laboratory Manager of BFAR-RFL XII who has the overall responsibility of ensuring that the strategic plan, and action plan of the BFAR-RFL is implemented.
- The Quality Assurance Manager, who has the overall responsibility for the implementation of the QMS.

5. Responsibilities and Authorities of Personnel

The responsibilities and authorities of all personnel who manage, perform or verify work affecting the quality of the tests are defined and made known to all employees in the standard operating procedures, work instructions, job descriptions and the organization charts.

All personnel is responsible for:

- a. The implementation, maintenance and improvement of the management system;
- b. Identification of deviations from the management system or from the procedures for performing laboratory activities;
- c. Initiation of actions to prevent or minimize such deviations.

6. Commitment of Top Management

a. Effective Communication

The management of BFAR-RFL XII provides the appropriate means, resources, mechanisms and procedures of QMS for effective communication within BFAR-RFL XII and outside.

Any announcements, meetings and general assemblies by and for personnel, both inside and outside BFAR-RFL XII, should be done through writing a formal letter with the logo of BFAR and the signature of personnel. This letter is sent through e-mail or facsimile to other offices within BFAR-RFL XII and outside.

b. Maintenance of Management System

This includes succession planning wherein each key personnel has responsibilities defined in SOP-01, Responsibilities and Authorities of Personnel. If manager is not present to handle the responsibilities and work given, the succeeding managers and personnel directly under them can take over the task.

The laboratory conducts an ISO Day once a month to provide awareness, monitor performance and evaluate competence of laboratory personnel.

c. Technical Competence

BFAR-RFL XII has the following measures:

- Assure that the staff has the appropriate technical capability and the competence.
- Provide and assure the most appropriate facilities and environmental conditions.
- Apply the most appropriate and validated methods for testing.
- Handle and maintain the appropriate equipment according to its scope and technical capabilities.
- Ensure measurement traceability to international standards and SI.
- Appropriate handling of test items for testing
- Apply quality control activities and report reliable results
