## Introduction

This document provides the principles for handling issues of facilities and environmental conditions of the laboratories according to the requirements of the sub clause 6.3 of the PNS ISO/IEC 17025:2017 standard.

## 1. Facilities

All the laboratories and the services of BFAR-RFLD XII are accommodated in building facilities, which allow their proper operation and meet specific requirements. In this respect, the building facilities of BFAR-RFLD XII provide sufficient area and space to the laboratories, with safety and limited access only to authorized personnel. In addition, they are organized in such a way to make the operation of the laboratories functional and efficient. Keeping the building facilities in good operating conditions is a vital priority. In this respect, a full maintenance and cleaning program is carried out according to the respective procedures and instructions.

## 2. Environmental Conditions

The laboratories of BFAR-RFLD XII operate under fully controlled environmental conditions with respect to temperature and humidity, at a minimum. The environmental conditions are fully monitored and recorded on a continuous basis. The analysis are stopped in any case that there are deviations of the environmental conditions from the specified limits.
