Document Type Quality Manual	Revision No: 0	Date Adopted: 13 Aug 2019	Page No: Page 1 of 2
Document Code: QM 4-02	SELECTION, VERIFICATION AND VALIDATION OF METHODS		

Introduction

This document provides the basic principles of testing methods of the analytical laboratories of BFAR RFLD XII according to the requirements of the sub clause 7.2 of the PNS ISO/IEC 17025:2017 standard.

1. Testing Methods

Tests are carried out by the use of international methods described within the respective laboratory procedures of the quality management system. The procedures provide full instructions for the application of the methods as well as references to the relevant standards and documents.

All methods, procedures and supporting documentation, such as instructions, standards, manuals and reference data relevant to the laboratory activities, is kept up to date and is made readily available to personnel.

BFAR RFLD XII ensures that it uses the latest valid version of a method unless it is not appropriate or possible to do so.

2. Validation of Methods

Validation procedures are applied to verify methods used in the laboratory.

When changes are made to a validated method, the influence of such changes is determined and when they are found to affect the original validation, a new method validation is performed.

The performance characteristics of validated methods, as assessed for the intended use, are relevant to the customers' needs and consistent with specified requirements.

3. Document

All WI Procedures referring to Testing Methods:

WI-01, Selection, Verification and Validation of Methods

WI-01-01, Method Verification

WI-01-CHE-01, Sample Preparation (Chemistry)

WI-01-CHE-02, Histamine

WI-01-CHE-03, Moisture Content

Prepared by: MA. MAURICE A. BANQUILING Quality Assurance Manager	Reviewed and Approved by: EUGENE GAY B. JAMORA Laboratory Manager
