Document Type Quality Manual	Revision No: 0	Date Adopted: 13 Aug 2019	Page No: Page 1 of 2
Document Code: QM 4-11	CONTROL OF DATA AND INFORMATION MANAGEMENT		

Introduction

This document provides the principles of control of data and information management of the quality management system according to the requirements of the sub clause 7.11 of the PNS ISO/IEC 17025:2017 standard.

1. Elements of Control of Data and Information Management

BFAR RFLD XII has access to the data and information needed to perform laboratory activities.

The laboratory information management system used for the collection, processing, recording, reporting, storage and retrieval of data is validated for functionality, including the proper functioning of interfaces within the laboratory information management system by the laboratory before introduction. Whenever there are any changes, including laboratory software configuration or modifications to commercial off-the-shelf software, they shall be authorized, documented and validated before implementation.

The laboratory information management system is:

- protected from unauthorized access;
- safeguarded against tampering and loss
- operated in an environment that complies with provider or laboratory specifications or, in the case of non-computerized systems, provides conditions which safeguard the accuracy of manual recording and transcription;
- maintained in a manner that ensures the integrity of the data and information;
- includes recording system failures and the appropriate immediate and corrective actions.

BFAR RFLD XII ensures that instructions, manuals and reference data relevant to the laboratory information management system are made readily available to personnel.

Calculations and data transfers are checked in an appropriate and systematic manner. This includes MS Office applications such as MS Excel, and using scientific calculators. **(Include documents they are authorized to access in Authorities of Personnel)**

2. Responsibilities

The responsibilities and the involved personnel are described and specified within the respective standard operation procedure for control of data and information management.

3. Documents

Prepared by: MA. MAURICE A. BANQUILING Quality Assurance Manager	Reviewed and Approved by: EUGENE GAY B. JAMORA Laboratory Manager
