

Document Type Quality Manual	Revision No: 0	Date Adopted: 13 Aug 2019	Page No: Page 1 of 2
Document Code: QM 5-06	CORRECTIVE ACTIONS		

Introduction

This document provides the principles to determine and implement corrective actions, which are undertaken according to the requirements of the sub clause 8.7 of the PNS ISO/IEC 17025:2017 standard.

1. Determination and Implementation of Corrective Actions

Corrective actions are undertaken to resolve non-conformities, which appear in the implementation of the quality system and aim at eliminating the source of non-conformities. In this respect, corrective actions may be undertaken in the framework of handling non-conformities, internal audits and complaints. In addition, corrective actions may be undertaken as a result of the management review. Corrective actions are implemented according to specified responsibilities and procedures.

2. Evaluation of Corrective Actions Implementation

BFAR-RFL makes use of the proper means and elements of the quality system to monitor and control the implementation of undertaken corrective actions. The evaluation of the corrective actions aims at determining:

- The degree of full implementation of corrective actions undertaken
- The efficiency in fully implementing the undertaken corrective actions
- The effect of corrective actions in improving the quality system and reducing the number of non-conformities

The evaluation of corrective actions provides basic quality indices to evaluate the overall performance of the quality system in management review.

3. Documents

SOP-17, Corrective Actions
SOP-10, Control and Handling Non-Conformities
SOP-16, Improvements
SOP-18, Internal Audits
SOP-19, Management Review
