

Document Type Quality Manual	Revision No: 0	Date Adopted: 13 Aug 2019	Page No: Page 1 of 2
Document Code: QM 5-08	MANAGEMENT REVIEW		

Introduction

This document provides the principles for management review according to the requirements of the sub clause 8.9 of the PNS ISO/IEC 17025:2017 standard.

2. Elements of Management Review

An official management review takes place once a year to review the performance of the quality management system within the last one-year period and to determine actions to implemented leading to a continuous improvement of the effectiveness of the quality management system.

The management review takes place under the responsibility and the commitment of the management of BFAR-RFL XII. In this respect, the management should:

- Consider the inputs provided by the Annual Report, the proposals of the involved personnel as well as by other sources.
- Have an outcome or a series of actions and decisions to be implemented.

The implementation of the actions decided by the management review is recorded and followed up on a continuous basis to assure effective implementation.

In addition, routine management reviews take place to follow up all issues regarding the implementation of the quality management system. A major task of the management reviews is the follow up of the actions and decisions of the official annual review.

Both the annual management review and the routine reviews make part of the management organization of BFAR-RFL XII and its strategic planning.

3. Quantitative Approach in Quality Review and Objectives

BFAR-RFLD XII makes use of proper indices to provide quantitative evidence of the performance of the quality management system. This index approach allows quantitative, continuous and long-term identification of: the implementation of the quality management system as well as follow up of the effectiveness of the decisions and actions of the management review.
