|                                                                                                                                            |  |  |  |
|--------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|
| Ability to implement and follow standard operating procedures (SOPs) and QC guidelines                                                     |  |  |  |
| Familiarity with laboratory quality control measures, including standardization, and proficiency testing                                   |  |  |  |
| Identifies deviations from expected results and takes corrective actions                                                                   |  |  |  |
| Maintains laboratory records and documentation to meet regulatory requirements                                                             |  |  |  |
| <b>LABORATORY SAFETY AND COMPLIANCE</b>                                                                                                    |  |  |  |
| Knowledge and adherence to safety procedures and regulatory requirements in the laboratory.                                                |  |  |  |
| Understanding of laboratory safety protocols, including proper handling of chemicals, reagents, and hazardous materials.                   |  |  |  |
| Familiar with personal protective equipment (PPE) usage, safety data sheets (SDS), and emergency procedures.                               |  |  |  |
| Knowledge of regulatory compliance standards (e.g., GLP, ISO, FDA, OSHA) and ensures that laboratory operations adhere to these standards. |  |  |  |
| <b>DOCUMENTATION AND REPORTING</b>                                                                                                         |  |  |  |
| Ability to document results, maintain accurate records, and prepare clear, concise reports.                                                |  |  |  |
| Consistently maintains accurate records of experiments, procedures, and results.                                                           |  |  |  |
| Properly documents deviations, quality control results, and other critical observations during testing.                                    |  |  |  |
| <b>ATTENTION TO DETAIL</b>                                                                                                                 |  |  |  |
| Precision and accuracy in performing tests and recording data.                                                                             |  |  |  |
| High attention to detail when conducting tests to avoid errors in measurements and sample preparation.                                     |  |  |  |
| Ability to detect inconsistencies or abnormalities in experimental results.                                                                |  |  |  |
| Ensures proper labeling and tracking of samples to avoid mix-ups.                                                                          |  |  |  |
| Double-checks calculations, data entries, and results for accuracy.                                                                        |  |  |  |
| <b>PROBLEM-SOLVING AND CRITICAL THINKING</b>                                                                                               |  |  |  |
| Ability to identify problems during analysis and apply critical thinking to find solutions.                                                |  |  |  |
| Ability to troubleshoot equipment malfunctions, process issues, and unexpected results.                                                    |  |  |  |
| Identifies potential problems in testing or sample handling and finds practical solutions.                                                 |  |  |  |
| Utilizes critical thinking to evaluate the validity and reliability of results and suggest alternative testing methods if necessary.       |  |  |  |
| Ability to think analytically to ensure accurate and reliable interpretations of data.                                                     |  |  |  |
| <b>TIME MANAGEMENT AND ORGANIZATIONAL SKILLS</b>                                                                                           |  |  |  |
| Efficient management of time and laboratory resources to meet deadlines and priorities.                                                    |  |  |  |
| Manages multiple tasks simultaneously without compromising accuracy or quality.                                                            |  |  |  |
| Prioritizes testing, sample analysis, and reporting based on urgency and turn-around time                                                  |  |  |  |
| Organizes laboratory resources (e.g., reagents, equipment, samples) efficiently to minimize downtime.                                      |  |  |  |
| Ability to work under pressure during high-demand periods and still maintain precision in results.                                         |  |  |  |
| <b>COMMUNICATION SKILLS</b>                                                                                                                |  |  |  |

|                                                                                                                                                                                                                                                                                                             |                                        |                              |                         |
